

Move Workloads without Changes to Best Practices or Tools

Security, Predictability, and Control

Security, predictability, and control make Oracle Cloud Infrastructure (OCI) the ideal platform for VMware. Rapidly transpose VMware estates to the cloud without changes to best practices or tools. VMware environments operate in a securely isolated customer tenancy with predictable performance and costs. Customers manage cloud infrastructure and VMware consoles with complete administrative control.

Achieve more with the unique Oracle Cloud VMware Solution

SAME OPERATIONAL MODEL AS ON-PREMISES¹

Customers have root access to host, owns update policy, run N-1 versions.

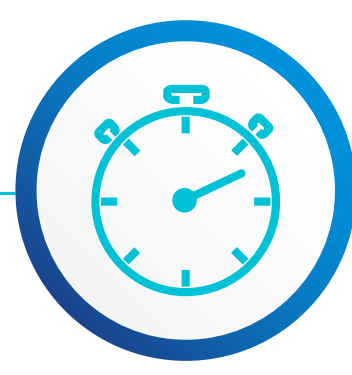

MORE REGIONS THAN ANY OTHER CLOUD PROVIDERS²

40 total regions, expanding to at least 44 by end of 2022.

EXCLUSIVE FEATURES NOT IN OTHER CLOUDS³

Exadata, RAC, Data Guard, Autonomous Database, others.

SUPERIOR ECONOMICS⁴

Lowest price per CPU core and per TB storage. No cost for first 10TB egress. Same pricing worldwide.

RUN LARGEST VMWARE WORKLOADS IN PUBLIC CLOUD⁵

54.5 TB of storage and up to 128 cores, per node. Up to 64 nodes per cluster.

Oracle Cloud VMware Solution Drives Profitable Outcomes

Proven TCO savings.

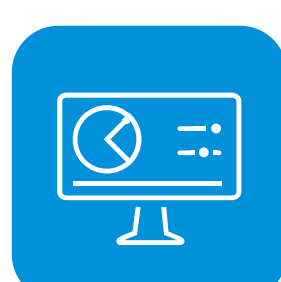

55% TCO Savings⁶

AYA Bank improves efficiency and cuts TCO by 55%

Less Expensive than Managed VMware Services⁷

Maxim's Group saves 114% by choosing Oracle Cloud VMware Solution

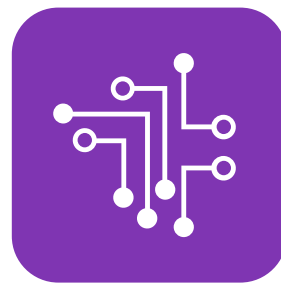

Less Expensive than On-Premises

Oracle Cloud VMware Solution is up to 65% less expensive than running workloads on-premises

Faster Backup and Restore⁸

Improved backup speed and restore speed 10-12 times faster

High-Speed Cloud Networking

99.95% SLA for network uptime, availability

Sustainability

Reduce carbon footprint by retiring physical datacenters

Why Oracle Cloud VMware Solution?

Predictable¹

Bring entire on-premises implementation to the public cloud. Full transfer of skills, tools, and processes.

Secured⁹

Deployed inside customer's virtual cloud network. Full control over network security policy. No Oracle access after provisioning.

Reach²

40 regions worldwide. Expanding to at least 44 by end of 2022. 27 regions outside of North America, 11 cloud regions connected to Azure, and 7 government regions.
